AdvanCONN®

HBA | PATENTED HELICAL BRACE ANCHOR

SIMPLE • SAFE • SECURE™

SIMPLE INSTALLATION

- Eliminates brace shoe removal and lost shoes
- Flexible connection alignment

SAFETY ASSURED

- Tested to 23,000 pounds ultimate tensile load
- Lab tested to more than 1,000,000 cycles
- Safe working load is 12,000 pounds

SECURE CONNECTION

- Aligns brace with helical shaft
- Reduces tension load on bolt by half

LOSE ANY SHOES LATELY?

The PATENTED AdvanConn® Helical Brace Anchor Connector eliminates the need to remove the shoe on temporary wall braces when connecting to helical ground anchors. The Helical Brace Anchor makes the connection safely and efficiently.

Due to long-term exposure to weather and job site conditions, brace shoes can be difficult to remove from the wall brace and, once removed, can be easily lost. The Helical Brace Anchor Connector provides a simple solution to this costly problem!
